Project Milestone 3

Completed Features:

- Home page
- Sign on page
- Light/Dark Mode
- Scheduling selection Page
- Database

Working Features during Demo:

- All features worked by themselves during the demo.
- Interoperability between all features is not working yet.

Issues during development and demo:

- Consistency between features became quite apparent during the demo.
- Minor errors and bugs while creating initial skeletons of the features.

Suggestions:

- Start deciding on a universal look for the website.
- Link together the features.
- Push and pull more so the group has more consistent up to date versions while working.
- Merge MySQL database over to Postgres.

Individual Contributions:

- Home page - Gabe
- Sign on page - Tristan
- Light/Dark Mode - Grayson
- Scheduler/Class selection Page - Owen
- Database - Solomon
